GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Final Grape Crush Report includes all grape tonnage crushed and purchased during the 1990 season. Changes in tonnage, Brix and prices from the preliminary report to this final report were due to: additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and were priced by February 25, 1991; late reports; and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix and weighted average prices were reported by grape type and variety as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 1990 crush totaled 2,570,707 tons, down 6 percent from the 1989 crush and 17 percent less than the record-large 1982 harvest of 3,115,531 tons. White wine varieties continued to account for the largest share of all grapes crushed, at 1,330,840, up 5 percent from 1989. The 1990 red wine variety crush totaled 804,294 tons, down 8 percent from 1989. Tons crushed for raisin and table type varieties were down 27 percent and 20 percent, respectively from 1989. (See chart below.)

California grape growers received an average price of \$279.56 per ton for grapes crushed in 1990, down 8 percent from the 1989 record high average price. This is the first drop in average price for grapes crushed since the 1985 crop year. (See chart page 2.) These price levels were not adjusted for inflation.

PRICE PAID PER TON GROWER RETURN DECREASES

AVERAGE PRICE FOR ALL VARIETIES

LEADING GRAPE VARIETIES AND DISTRICTS

French Colombard, the most widely planted wine grape variety in California, continued its dominance with approximately 27 percent of the crush volume. Chenin Blanc surpassed Thompson Seedless, a raisin variety grape, for second place with approximately 11 percent of the total crush. Thompson Seedless dropped to third place with approximately 9 percent of the total crush. The remaining top ten varieties were all wine varieties except the seventh largest -- Flame Tokay which falls into the table grape classification.

Grapes produced in District 4 (Napa County) received the highest average price of \$1,241.50 per ton, up 8 percent from 1989. District 3 (Sonoma and Marin counties) received the second highest return of \$977.18, up 5 percent from 1989. Of the grapes grown Statewide, four of the top five varieties receiving the highest average price were red type varieties. Petite Verdot received the highest average price of \$1,406.63 per ton followed by Cabernet Franc at \$1,298.91 per ton and Merlot at \$1,220.35 per ton. The 1990 Chardonnay price of \$1,128.33 was down 8 percent from last year, while the 1990 Cabernet Sauvignon price of \$977.16 was down 5 percent from last year. The average price for Zinfandel grapes continued to decline. This year's average price of \$391.34 was 28 percent lower than last year and 52 percent lower than the 1988 record high average price of \$817.48.

PERCENT OF TOTAL CRUSH

GRAPE PRICE PER TON BY TYPE OF GRAPE, 1981-90

SOURCE: GRAPE CRUSH REPORT

EXPLANATION OF TABLES

TABLE 1 is a summary of the 1990 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1989 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1990 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1989 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 1990 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1989 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1990 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1989 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1990 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1989 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1990 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1989 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1991 and include reference price contracts written prior to January 1, 1977 with final prices as of February 25, 1991. Weighted average prices also include any Brix adjustments, bonuses, or allowances. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

Variety	Dist.	Total Grapes Crushed		Net Weight Fresh Tons	Final Prices of Grapes Purchased from Grower(s)														
		Over The Scale Tons	Wtd. Ave. Degrees Brix		Wtd. Avg. Degree Brix	Total Brix Column 5 x 6	Base Price Per Ton	Acceptable Brix Limits		Brix Adjustment Factors Per Degree Plus or Minus	Brix Adjustment Limits		Actual Final Price Paid By Winery to Grow at Each Base Price and Brix Adjustment Factor Including Bonuses or Allowances, Dollars/Ton		Total Paid (Column 13 x B)	Wtd. Average Price Per Ton			
								Min.	Max.		Base	Min.	Max.	B			C		
Column =		3	4	5	6	A	7	8	9	10	12	13	14	B	C	15			
Zinfandel	1	100.0	20.1	100.0	20.1	2,010.00	\$450.00	19.0	25.0	+ or - 10%	22.0	20.0	24.0	\$364.50	\$36,450.00				
Zinfandel	1	20.5	21.3	20.5	21.3	436.65	450.00	19.0	25.0	+ or - 10%	22.0	20.0	24.0	418.50	8,579.25				
Zinfandel	1	10.6	23.5	10.6	23.5	249.10	450.00	19.0	25.0	+ or - 10%	22.0	20.0	24.0	517.50	5,485.50				
Combined	1	131.1	20.6	131.1	20.6	2,695.75	450.00	19.0	25.0	+ or - 10%	22.0	20.0	24.0	\$50,514.75	\$385.31				

Columns 4 and 6 were obtained by dividing the total Net Fresh Tons, (Columns 3 and 5) into the total Brix of these same tons (Column A): $\frac{2,695.75}{131.1} = 20.6$

Column 15 was obtained by dividing the total Net Fresh Tons, (Column 5) into the total dollars paid for these same tons (Column C): $\frac{\$50,514.75}{131.1} = \385.31

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1990 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1989 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, percent of purchased tonnage, type, variety and reporting district where grown. Weighted average base prices are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 1990 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing districts and variety. Comparisons with 1989 are shown.

a/ See code descriptions beginning on page 57.

b/ Percentage total by variety will not necessarily add to 100.00 due to rounding.

c/ Less than .005 percent.

d/ Price basis per degree Brix.

e/ Price per degree Brix not included in weighted average base price.

f/ All prices based on per degree Brix.

Table 8 - Supplement

BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices. NOTE: Brix adjustment factors designated with an asterisk were added since release of the Preliminary Grape Crush Report, 1990 crop.

GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Final Grape Crush Report includes all grape tonnage crushed and purchased during the 1992 season. Changes in tonnage, Brix and prices from the preliminary report to this final report were due to: additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and were priced by February 25, 1993; late reports; and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix and weighted average prices were reported by grape type and variety as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 1992 crush totaled 3,097,726 tons, up approximately 21 percent from the 1991 crush and down less than 1 percent from the record-large 1982 crush of 3,115,531 tons. White wine varieties continued to account for the largest share of all grapes crushed, at 1,209,029, down 6 percent from 1991. The 1992 red wine variety crush totaled 887,715 tons, up 6 percent from 1991. Tons crushed for raisin type varieties were up a record 177 percent, while tons crushed for table type varieties were up 38 percent. (See chart below.)

California grape growers received an average price of \$326.51 per ton for grapes crushed in 1992, up approximately 4 percent from the 1991 average price. This makes the 1992 price the highest on record. (See chart, page 2.) These price levels were not adjusted for inflation.

PRICE PAID PER TON GROWER RETURN INCREASES

AVERAGE PRICE FOR ALL VARIETIES

LEADING GRAPE VARIETIES AND DISTRICTS

Thompson Seedless, a raisin grape variety, replaced French Colombard as the variety accounting for the largest percentage of crush volume, 24 percent. This is up 14 percentage points from 1991. French Colombard fell to second place with 17 percent of the total crush. The remaining top ten were all wine varieties. (See chart, page 3.)

Grapes produced in District 4 (Napa County) received the highest average price of \$1,218.29 per ton, down 3 percent from 1991. District 3 (Sonoma and Marin counties) received the second highest return of \$979.97, down 1 percent from 1991. Of the grapes grown Statewide, the top five varieties receiving the highest average price were all wine grape varieties. Petite Verdot received the highest average price of \$1,545.92 per ton, up 9 percent from last year. Cabernet Franc received the second highest average price of \$1,180.57 per ton followed by Pinot Gris at \$1,151.39 per ton, Merlot at \$1,101.11 per ton, and Flora at \$1,097.92. The 1992 Chardonnay price of \$1,038.19 was down 7 percent from last year, while the 1992 Cabernet Sauvignon price of \$872.42 was down 5 percent from last year. Breaking a downward trend, the 1992 average price for Zinfandel grapes rose to \$434.13, 20 percent higher than last year, but 47 percent lower than the 1988 record high average price of \$817.48.

EXPLANATION OF TABLES

TABLE 1 is a summary of the 1992 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1991 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1992 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1991 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 1992 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1991 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1992 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1991 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1992 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1991 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1992 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1991 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1993 and include any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 1993. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

DATA PAGE

Pette Sireh	1			20.5	19.0	389.5	20.5	19.0	389.50	450.0	18.0	25.0	+ or - 10%		22.0	20.0	24.0	418.50		8,579.25
Pette Sireh	1			10.8	23.5	248.1	10.8	23.5	249.10	450.0	18.0	25.0	+ or - 10%		22.0	20.0	24.0	517.50		5,485.50
Combined	1			166.8	20.6	3,841.8	131.1	20.2	2,846.8	450.0	18.0	25.0	+ or - 10%		22.0	20.0	24.0	385.31		50,514.75

Column 4 was obtained by dividing the total Over the Scale Tons (Column 3) into the Total Brix of these same tons (Column A):

$$\frac{3,841.9}{186.6} = 20.6$$

Column 6 was obtained by dividing the Purchased Tons Only (Column 5) into the Total Brix of these same tons (Column B):

$$\frac{2,648.6}{131.1} = 20.2$$

Column 15 was obtained by dividing the total Purchased Tons Only (Column 5) into the total dollars paid for these same tons (Column C):

$$\frac{\$50,514.75}{131.1} = \$385.31$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1992 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1991 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, percent of purchased tonnage, type, variety and reporting district where grown. Weighted average base prices are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 1992 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing districts and variety. Comparisons with 1991 are shown.

a/ See code descriptions beginning on page 58.

b/ Percentage total by variety will not necessarily add to 100.00 due to rounding.

c/ Less than .005 percent.

d/ Price basis per degree Brix.

e/ Price per degree Brix not included in weighted average base price.

f/ All prices based on per degree Brix.

Table 8 - Supplement

BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Final Grape Crush Report includes all grape tonnage crushed and purchased during the 1993 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and were priced by February 25, 1994, late reports; and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix and weighted average prices were reported by grape type and variety, as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 1993 crush totaled 2,894,197 tons, down approximately 7 percent from the 1992 crush and 7 percent less than the record-large 1982 crush of 3,115,531 tons. White wine varieties continued to account for the largest share of all grapes crushed, at 1,326,510, up 10 percent from 1992. The 1993 red wine variety crush totaled 978,717 tons, up 10 percent from 1992. Tons crushed for raisin type varieties were down 42 percent from last year's record level of 784,910 tons, while tons crushed for table type varieties were down 37 percent. (See chart below.)

California grape growers received an average price of \$328.59 per ton for grapes crushed in 1993, up 1 percent from the 1992 average price. This makes the 1993 price the highest on record. (See chart, page 2.) These price levels were not adjusted for inflation.

PRICE PAID PER TON GROWER RETURN INCREASES

AVERAGE PRICE FOR ALL VARIETIES

LEADING GRAPE VARIETIES AND DISTRICTS

French Colombard, a white wine grape variety, regained its position from Thompson Seedless as the variety accounting for the largest percentage of crush volume, 21 percent. Thompson Seedless fell to second place with 14 percent of the total crush. The remaining top ten were all wine varieties. (See chart, page 3.)

Grapes produced in District 4 (Napa County) received the highest average price of \$1,174.58 per ton, down 4 percent from 1992. District 3 (Sonoma and Marin counties) received the second highest return of \$935.35, down 5 percent from 1992. Of the grapes grown Statewide, the top five varieties receiving the highest average price were all wine grape varieties. Petite Verdot received the highest average price of \$1,546.90 per ton, up less than 1 percent from last year. Pinot Gris received the second highest average price of \$1,156.08 per ton followed by Sangiovese/Sangiovese at \$1,099.27 per ton, Cabernet Franc at \$1,076.17 per ton, and Merlot at \$1,035.76. The 1993 Chardonnay price of \$888.73 was down 14 percent from last year, while the 1993 Cabernet Sauvignon price of \$801.88 was down 8 percent from last year. Continuing its upward movement from 1992, the 1993 average price for Zinfandel grapes rose to \$438.08, 1 percent higher than last year, but 46 percent lower than the 1988 record high average price of \$817.48.

SOURCE: GRAPE CRUSH REPORT

EXPLANATION OF TABLES

TABLE 1 is a summary of the 1993 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1992 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1993 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1992 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 1993 crop. The weighted average degrees Brix is reported by grape pricing district and variety. State averages for 1992 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1993 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing district. State totals for 1992 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1993 crop. The weighted average degrees Brix is reported by grape pricing district and variety. State averages for 1992 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1993 crop. The weighted average prices are reported by variety, and grape pricing district. State averages for 1992 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1994 and include any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 1994. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

Price Per Ton	Total Paid (Col. 5 x Col. 15)
											Min.	Max.	Plus	Minus		Base	Min.	Max.		
Pette Breh	1			155.5	20.6	3,203.3	100.0	20.1	2,010.0	450.0	19.0	25.0	+ or - 10%		22.0	20.0	24.0	384.50	38,450.00	
Pette Breh	1			20.5	19.0	389.5	20.5	19.0	389.50	450.0	19.0	25.0	+ or - 10%		22.0	20.0	24.0	418.50	8,579.25	
Pette Breh	1			10.6	23.5	249.1	10.6	23.5	249.10	450.0	19.0	25.0	+ or - 10%		22.0	20.0	24.0	617.50	6,486.50	
Combined	1			186.6	20.6	3,841.9	131.1	20.2	2,648.6	450.0	19.0	25.0	+ or - 10%		22.0	20.0	24.0	385.31	50,514.75	

Column 4 was obtained by dividing the total Over the Scale Tons (Column 3) into the Total Brix of these same tons (Column A):

$$\frac{3,841.9}{186.6} = 20.6$$

Column 6 was obtained by dividing the Purchased Tons Only (Column 5) into the Total Brix of these same tons (Column B):

$$\frac{2,648.6}{131.1} = 20.2$$

Column 15 was obtained by dividing the total Purchased Tons Only (Column 5) into the total dollars paid for these same tons (Column C):

$$\frac{\$50,514.75}{131.1} = \$385.31$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1993 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1992 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, percent of purchased tonnage, type, variety and reporting district where grown. Weighted average base prices are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 1993 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 1992 are shown.

a/ See code descriptions beginning on page 60.

b/ Percentage total by variety will not necessarily add to 100.00 due to rounding.

c/ Less than .005 percent.

d/ Price basis per degree Brix.

e/ Price per degree Brix not included in weighted average base price.

f/ All prices based on per degree Brix.

Table 8 - Supplement

BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

Dear Grape Crush User:

The enclosed Errata To the Final Grape Crush Report For The 1994 Crop ^{- FINAL} ^{errata} contains revised information received after the March 10, 1995 release of the Final Grape Crush Report.

Conducting a Departmental verification of data reported on grape crush questionnaires has been discussed for several years by industry representatives. Following guidance provided by the industry prior to the 1994 grape harvest, our Division had Market Enforcement Branch contact 103 randomly selected wineries after the March 10 publication date to verify the accuracy of the crush reports. Each California winery had a chance to be selected in the sub-sample. The Department used random sampling to control verification costs.

All changes from this verification are included in the enclosed errata, regardless of the significance of the change.

Sincerely,

Carol D. Chesbrough

Carol D. Chesbrough, Director
Division of Marketing Services

GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Final Grape Crush Report includes all grape tonnage crushed and purchased during the 1994 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and were priced by February 25, 1994, late reports; and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix and weighted average prices were reported by grape type and variety, as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 1994 crush totaled 2,538,908 tons, down approximately 12 percent from the 1993 crush and 19 percent less than the record-large 1982 crush of 3,115,531 tons. White wine varieties continued to account for the largest share of all grapes crushed, at 1,241,530, down 6 percent from 1993. The 1994 red wine variety crush totaled 935,651 tons, down 4 percent from 1993. Tons crushed for raisin type varieties totaled 238,936, down 70 percent from the 1992 record level of 784,910 tons, while tons crushed for table type varieties totaled 122,792, down 10 percent from last year. (See chart below.)

California grape growers received an average price of \$349.08 per ton for grapes crushed in 1994, up 6 percent from the 1993 average price. This makes the 1994 price the highest on record. (See chart, page 2.) However, this was primarily due to the mix of varieties. Varietal prices were generally lower, except for Cabernet Sauvignon, Merlot, and Pinot Noir. These price levels were not adjusted for inflation.

PRICE PAID PER TON

GROWER RETURN INCREASES

LEADING GRAPE VARIETIES AND DISTRICTS

French Colombard, a white wine grape variety, continued its dominance with approximately 21 percent of the crush volume. Chardonnay was second place with 12 percent of the total crush. Nine of the remaining top ten were all wine varieties. (See chart, page 3.)

Grapes produced in District 4 (Napa County) received the highest average price of \$1,198.45 per ton, up 2 percent from 1993. District 3 (Sonoma and Marin counties) received the second highest return of \$980.59, up 5 percent from 1993. Of the grapes grown Statewide, the top five varieties receiving the highest average price were all wine grape varieties. Petite Verdot received the highest average price of \$1,517.87 per ton, down 2 percent from last year. Marsanne received the second highest average price of \$1,516.78 ¹/ per ton followed by Mataro at \$1,333.65 per ton, Rousanne at \$1,200.00 ¹/ per ton, and Sangiovese/Sangiovese at \$1,147.44. The 1994 Chardonnay price of \$832.32 was down 6 percent from last year, while the 1994 Cabernet Sauvignon price of \$816.08 was up 2 percent from last year. Continuing its upward movement from 1993, the 1994 average price for Zinfandel grapes rose to \$463.24, 5 percent higher than last year, but 43 percent lower than the 1988 record high average price of \$817.48.

¹/ These purchases involved a small amount of tonnage.

EXPLANATION OF TABLES

TABLE 1 is a summary of the 1994 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1993 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1994 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1993 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 1994 crop. The weighted average degrees Brix is reported by grape pricing district and variety. State averages for 1993 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1994 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing district. State totals for 1993 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1994 crop. The weighted average degrees Brix is reported by grape pricing district and variety. State averages for 1993 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1994 crop. The weighted average prices are reported by variety, and grape pricing district. State averages for 1993 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1994 and include any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 1994. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

DATA PAGE																			
IDENTIFICATION				SECTION I				SECTION II											
				Total Grapes Crushed At Your Facility				Final Prices Of Grapes Purchased From Grower(s) For Wine, Concentrate, Juice, Vinegar And Beverage Brandy											
VARIETY (List full name)	Dist. Where Grown	Code	Line	Over The Scale Tons	Wtd. Avg. Degrees Brix	Total Brix (Col. 3 X Col. 4)	Purchased Tons Only	Wtd. Avg. Petite Sirch	1			20.5	19.0	389.5	20.5	19.0	389.50	450.0	19.0	26.0	+ or - 10%		22.0	20.0	24.0	418.50	8,579.25
Petite Sirch	1			10.8	23.5	249.1	10.8	23.5	249.10	450.0	19.0	26.0	+ or - 10%		22.0	20.0	24.0	517.50	5,485.50
Combined	1			186.6	20.6	3,841.9	131.1	20.2	2,648.6	450.0	19.0	26.0	+ or - 10%		22.0	20.0	24.0	385.31	50,514.75

Column 4 was obtained by dividing the total Over the Scale Tons (Column 3) into the Total Brix of these same tons (Column A):

$$\frac{3,841.9}{186.6} = 20.6$$

Column 6 was obtained by dividing the Purchased Tons Only (Column 5) into the Total Brix of these same tons (Column B):

$$\frac{2,648.6}{131.1} = 20.2$$

Column 15 was obtained by dividing the total Purchased Tons Only (Column 5) into the total dollars paid for these same tons (Column C):

$$\frac{\$50,514.75}{131.1} = \$385.31$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1994 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1993 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 1994 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 1993 are shown.

a/ See code descriptions beginning on page 61.

b/ Price basis per degree Brix.

c/ Price per degree Brix not included in weighted average base price.

d/ All prices based on per degree Brix.

Table 8 - Supplement

BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.
